QUALITY ANALYST ENGINEER

Detail-oriented Software Test Engineer with hands-on experience in manual testing, data validation, and e-commerce application testing. Strong knowledge of SDLC/STLC, test case design, defect lifecycle, and SQL validation. Experience in testing web applications including functional, regression, and API testing. Skilled in identifying defects, ensuring data integrity, and improving application quality. Seeking a QA/Test Engineer role in a growth-oriented organization.

STRENGTHS AND EXPERTISE

Manual Testing	JIRA	Content management
Functional testing	Postman	Requirement Analysis
Regression testing	MYSQL Workbench	Project Documentation
Test Scenarios & Testcase Design	SDLC, STLC, Bug Reports	

PROJECT EXPERIENCE

E-Commerce Testing Project

I designed and executed this project to demonstrate my practical skills as a QA Test Engineer. I chose the SauceDemo e-commerce application as the test target because it closely mirrors real industry applications and allows full testing of a complete purchase workflow from login to order confirmation. This project covers the complete software testing lifecycle including test planning, test case design, test execution, defect reporting, API testing, and database validation — all documented and version controlled on GitHub.

Accomplishments:

- I started by understanding the application thoroughly and identifying all features that needed testing. I then wrote a formal Test Plan defining the scope, approach, tools, entry and exit criteria. Next I created a Requirement Traceability Matrix linking each requirement to its corresponding test case.
 - I wrote 55 test cases covering 8 functional modules using techniques like Equivalence Partitioning, Boundary Value Analysis, and Positive and Negative Testing. After executing all 55 test cases on the live application I found 4 defects which I documented and logged in JIRA with detailed steps to reproduce, screenshots, severity and priority.
 - In the second phase I performed API testing using Postman on 10 REST API endpoints testing GET, POST, PUT and DELETE operations and validated all response codes and data. In the third phase I created a test database in MySQL Workbench with 3 tables and wrote 10 SQL validation queries to verify data integrity across the database.
-

WORK EXPERIENCE

Dadi Institute of Engineering & Technology

Oct 2023 - Nov 2025

Assistant Professor

Job Responsibilities:

- As an Assistant Professor in Computer Science Engineering Stream at Dadi Institute of Engineering & Technology for two years, I contributed to both academic teaching and cutting-edge research in the field of Artificial Intelligence (AI), with a focus on its application to database management systems, web development, and research innovations at the junior level.
- Designed and delivered lectures on Database Management Systems (DBMS), and Programming Languages (C, SQL) for undergraduate students.
- Developed curriculum and hands-on projects, providing students practical exposure to web technologies, databases, and AI tools.

Achievements:

- Published IEEE papers on blockchain-based voting systems and web technologies, emphasizing practical applications and education.
- Authored book chapters on AI integration with modern databases, focusing on optimizing data retrieval and management.

OMICS International Pvt Ltd

Oct 2022 - Oct 2023

Assistant Managing Content Editor

- Conducted content verification, validation, and proofreading aligned with quality standards.
- Ensured accuracy and completeness before final release, similar to UAT-level checks.
- Coordinated with internal and external stakeholders to resolve content defects.
- Maintained high-quality benchmarks across digital publishing platforms.
- Overseeing end-to-end digital marketing strategies and content marketing initiatives, utilizing SEO and SMM tools to optimize online presence.
- Curating captivating content for articles sourced from international professional writers, performing content editing, proofreading, and ensuring the integration of expert insights.

Chandusoft Technologies Pvt Ltd

Dec 2021 - Sep 2022

Junior Data Analyst Engineer

- In my role as a Junior Data Analyst Engineer- ITES, I contributed to the "Discounted Codes" project.
- By enhancing the visibility and appeal of e-commerce sites, I played a key role in driving increased user engagement and views.
- Validated e-commerce application data and content, ensuring functional accuracy and completeness.
- Tested discount codes, offers, and site content for correctness and usability.
- Reported issues related to data mismatch and incorrect outputs, improving end-user experience.
- Supported QA activities through systematic data review and validation.

Patra India

Oct 2019 - Dec 2021

Process Executive

- Performed data validation, quality checks, and error identification for US insurance certificate issuance systems.
- Ensured accuracy, consistency, and compliance of application data across multiple insurance modules.
- Identified data defects and coordinated with internal teams for resolution, supporting quality assurance standards.
- Worked within defined workflows and SLAs, contributing to defect reduction and process improvement.

Project Experience:

U.S. Insurance Liability Certificate Management System

- Created and validated U.S. insurance liability certificates—including auto, health, workers' compensation, employer, and general liability—ensuring one-year validity, accuracy, and timely updates within defined constraints.
- Collaborated with client teams to gather requirements, process requests, and translate business needs into precise documentation and internal workflows.
- Conducted quality checks on policy documents to ensure compliance, data integrity, and smooth client reporting.
- Prepared proposals, documentation, and meeting notes while maintaining strong client relationships and resolving queries promptly.

EDUCATION**2015 - 2019 | Dadi Institute of Engineering & Technology****Bachelor of Technology (B. Tech) in Computer Science Engineering**

- Secured Grade: A Academic percentage: 75.63

2019 - 2021 | Dadi Institute of Engineering & Technology**Master of Technology (M. Tech) in Software Engineering (Computer Science & Engineering)**

- Secured Grade: A Secured CGPA: 7.5
